WHO ARE WE?

The Observatory SOS-Attendance is a center for the study and research of school attendance issues. It aims to provide society with the first observatory dedicated to school attendance, serving as a reference website. In addition, it will offer regular reports, conduct research, provide training, and organize awareness-raising campaigns.

OUR OBJECTIVES

Create the Observatory SOS-Attendance to:

1. Investigate the causes of school attendance problems.
2. Develop studies on school attendance problems according to different factors.
3. Disseminate an action protocol to combat school attendance problems.
4. Offer advice and training actions for teachers and families.
5. Promote online knowledge.
6. Promote awareness campaigns against school attendance problems and early school dropout .

1ST MEETING IN ALICANTE (SPAIN)

Our Spanish team organized the first face-to-face meeting in Alicante (Spain) from 19th to 21th July 2023. These days we could discuss about our objectives and our next lines of work related with the assessment of school attendance problems, and also we discovered the Spanish culture.

OBSERVATORY SOS-ATTENDANCE IN

It was presented in a virtual symposium at the International Congress on Education and Innovation on 28, 29, and 30 June 2023 organized by Autonomous of Yucatan and the University of Granada.

INTERVIEW WITH THE EFE AGENCY

El absentismo escolar, la antesala a un posible abandono de los estudios en el futuro

Guzmán Robador

Carolina González, the principal investigator, was interviewed by the EFE Agency, where she had the opportunity to expose our objectives and the approach we aim to carry out.
